2Q/1H22 Results

2Q confirmed the positive growth trend already registered in 1Q. Overall, we believe that the figures disclosed increase the visibility on the ongoing recovery of the group's sales and margins. However, we believe that investors are currently more focused on the developments linked to the tender offer launched by Esprinet than on financials.

Voluntary public tender offer launched by Esprinet

Esprinet has recently announced that Consob, the Italian market authority, has approved the offer document related to the voluntary public tender offer launched by 4Side (a company fully-owned by Esprinet) on Cellularline. The 'acceptance period' starts on 19 September and ends on 14 October. We recall that the offering price was set at EUR 3.75/share.

Cell's BoD considers EUR 3.75/sh bid price not adequate

The Board of Directors of Cellularline has recently announced that it considers the offered consideration of EUR 3.75 for each Cellularline share tendered in acceptance of the offer to be inadequate from a financial point of view. We underline that Cellularline's BoD also stated that it had taken into account the work carried out by its financial advisor (Equita), which issued a fairness opinion in which it expressed its opinion on the non-adequateness, from a financial point of view, of the consideration. In particular, Equita indicated a DCF valuation-based range of EUR $6.6-8.7/{\rm share}$ or applying other valuation methodologies a broader valuation range of EUR $4.0-8.7/{\rm share}$.

Estimates & valuation considerations

We updated our FY22E figures solely to incorporate the EUR 39.9M impairment on goodwill reported in 1H22 due to a review carried out by the company on their financials. On the other hand, we kept our FY23E projections unchanged. While during the offering period we align our target price to the bid price (TP at EUR 3.75/share; HOLD rating), we highlight that if we re-ran our DCF-based valuation model this would return a fair value of EUR 5.0.

2Q/1H22A Results

Revenues were EUR 54.6M, up by 37.4% yoy (+36% on a like-for-like basis, thus excluding the contribution of the newly-acquired company Coverlab, and +35.3% in 2Q). The strong performance was achieved thanks to the recovery of demand both in the domestic and international markets. International revenues also benefitted from the strong rebound registered by Worldconnect, thanks to the increase in traffic recorded in the Airport Travel Retail channel vs. last year. Looking at product lines, we highlight that: 1) the Red Line grew by 38.1% yoy, mainly driven by the recovery in demand on international markets; 2) The Blue Line grew by EUR 3.5M yoy, mainly due to increased demand for products of non-Group owned brands distributed in Italy; and 3) the Black Line was down by 8.8% (or EUR 0.4M).

Adjusted EBITDA was EUR 3.3M vs. EUR 1.6M in 1H21. The EBITDA margin improved to 6.1% (vs. 4.0%) as a direct result of the higher absorption of fixed costs due to the strong revenue growth in the period and a tight cost control policy implemented by management. The **adjusted net loss stood at EUR 0.3M** vs. EUR 0.2M in 1H21.

Cellularline carried out an impairment test (consistent in its methodological approach to that adopted at YE21) updating all relevant parameters used and also to incorporate in the WACC a factor that increased the risk of execution of the plan as a consequence of macroeconomic uncertainty. At the end of the test, an impairment loss on goodwill of EUR 39.9M was reported in the income statement, attributable to the effect of the significant increase in the discount rate used for the purposes of the test, which firstly reflects the significant worsening seen during the first half of the year (and in particular during 2Q) of macroeconomic parameters. As a result, reported EBIT was negative for EUR 44.8M.

As a consequence, the book value of shareholders' equity was reduced to EUR 162.3M as of 30 June 2022, implying a book value/share of around EUR 7.8 per outstanding share (or EUR 7.4/total no. shares).

The **net financial position was EUR 40.2M** vs. a net debt of EUR 37.4M at YE21A.

Valuation Considerations

While during the offering period we aligned our target price to the bid price (**TP at EUR 3.75/share**; **HOLD rating**), we highlight that if we re-ran our DCF-based valuation model this would return a fair value of EUR 5.0/share, thus around 33% above of the offering price.

We use the following key assumptions in our valuation:

An 8.3% WACC, incorporating a risk-free rate of 3.0% (vs. 2.5% used in our previous report), an equity risk premium of 6.5%, a re-levered beta of 1.2x (source: Intesa Sanpaolo Research elaboration on Refinitiv) and a long-term target gearing ratio of 30%;

- Terminal value growth is prudentially set at 0% while, in calculating the LT, we apply the same level of revenues and EBIT margin we expect in 2023E. As usual, LT depreciation equals capex;
- We did not adjust the number of shares to include the effects arising from the potential conversion of warrants to obtain a fair value more comparable with the offering price (we recall that the warrants have a strike price of EUR 9.5 and a mandatory exercise price of EUR 13.0 and will expire in 2023).

Company Snapshot

Company Description

Cellularline is the European market leader in the design, manufacturing and distribution of accessories for connectivity devices. Leveraging on more than 5,000 points of sales, the company reaches more than 60 countries in the world and covers all the major distribution channels (CE, Telco, Travel Retail, Mass Merchandise, Sport stores as well as other retailers). Cellularline has a wide product portfolio composed of three major categories: (i) Protection & Style (cases and screen protectors); (ii) Charge & Utilities (battery chargers, powerbanks, car accessories and cables); and (iii) Voice & Sport (earphones and sports accessories). Moreover, the company recently launched the AQL brand (AudioQuality Lab), the product line dedicated to the world of music.

Key Risks

Company specific risks:

- Global logistics issues might affect cost base;
- A resurgence of restrictive measures;
- Still small contribution from the e-commerce channel.

Sector generic risks:

- An increase in competition from the main competitors and a potentially higher penetration of private labels and online competitors;
- Potentially rapid changes in consumer trends and needs, also given the fast-technological evolution of electronics' components and accessories, with a possible impact on the group's strategy and brand awareness

Our Mid Corporate Definition

Italy is characterised by a large number of non-listed and listed micro, small and medium-sized companies. Looking at the revenues of these Italian companies, around 5,000 companies eligible for listing have revenues below EUR 1,500M based on Intesa Sanpaolo elaborations. We define these companies as 'Mid Corporate'. Looking more specifically at Italian listed companies, we include in our Mid Corporate segment all STAR companies and those with a market capitalisation below EUR 1Bn.

Coverage policy and frequency of research reports

The list of companies covered by the Research Department is available upon request. Intesa Sanpaolo SpA aims to provide continuous coverage of the companies on the list in conjunction with the timing of periodical accounting reports and any exceptional event that affects the issuer's operations. The companies for which Intesa Sanpaolo SpA acts as sponsor or specialist or other regulated roles are covered in compliance with regulations issued by regulatory bodies with jurisdiction. In the case of a short note, we advise investors to refer to the most recent company report published by Intesa Sanpaolo SpA's Research Department for a full analysis of valuation methodology, earnings assumptions, risks and the historical of recommendation and target price. In the Equity Daily note and Weekly Preview report the Research Department reconfirms the previously published ratings and target prices on the covered companies (or alternatively such ratings and target prices may be placed Under Review). Research qualified as a minor non-monetary benefit pursuant to provisions of Delegated Directive (EUR) 2017/593 is freely available on the IMI Corporate & Investment Banking Division web site (www.imi.intesasanpaolo.com); all other research is available by contacting your sales representative.

Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (ie, holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

Equity rating key: (long-term horizon: 12M)

In its recommendations, Intesa Sanpaolo SpA uses an "absolute" rating system, which is not related to market performance and whose key is reported below:

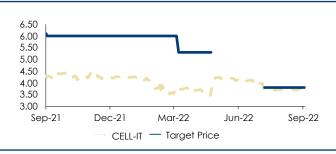

Equity Rating Key (long-term horizon: 12M)

Long-term rating	Definition
BUY	If the target price is 20% higher than the market price
ADD	If the target price is 10%-20% higher than the market price
HOLD	If the target price is 10% below or 10% above the market price
REDUCE	If the target price is 10%-20% lower than the market price
SELL	If the target price is 20% lower than the market price
RATING SUSPENDED	The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and target price, if any, are no longer in effect for this stock.
NO RATING	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances.
TENDER SHARES	We advise investors to tender the shares to the offer.
TARGET PRICE	The market price that the analyst believes the share may reach within a one-year time horizon
MARKET PRICE	Closing price on the day before the issue date of the report, as indicated on the first page, except where otherwise indicated

Historical recommendations and target price trends (long-term horizon: 12M)

Valuation methodology (short-term horizon: 3M)

Our short-term investment ideas are based on ongoing special market situations, including among others: spreads between share categories; holding companies vs. subsidiaries; stub; control chain reshuffling; stressed capital situations; potential extraordinary deals (including capital increase/delisting/extraordinary dividends); and preys and predators. Investment ideas are presented either in relative terms (e.g. spread ordinary vs. savings; holding vs. subsidiaries) or in absolute terms (e.g. preys).

The companies to which we assign short-term ratings are under regular coverage by our research analysts and, as such, are subject to fundamental analysis and long-term recommendations. The main differences attain to the time horizon considered (monthly vs. yearly) and definitions (short-term 'long/short' vs. long-term 'buy/sell'). Note that the short-term relative recommendations of these investment ideas may differ from our long-term recommendations. We monitor the monthly performance of our short-term investment ideas and follow them until their closure.

Equity rating key (short-term horizon: 3M)

Short-term rating	Definition
LONG	Stock price expected to rise or outperform within three months from the time the rating was assigned due to
	a specific catalyst or event
SHORT	Stock price expected to fall or underperform within three months from the time the rating was assigned due
	to a specific catalyst or event
